[1] The GDP chain-type price index is used to convert the current-dollar statistics to 2005=100 equivalents.

[2] Value of production, Government payments, other farm-related cash income, and nonmoney income produced by farms including imputed rent of farm dwellings.

[3] Crop receipts include proceeds received from commodities placed under Commodity Credit Corporation loans.

[4] The value of production equates to the sum of cash receipts, home consumption, and the value of the change in inventories.

Note: Data for 2012 and 2013 are forecasts.
